## **CHASE PARTNERING AGREEMENT**

The NM Occupational Health and Safety Bureau (NM OSHA) and Associated General Contractors (AGC), NM Building Branch, mutually recognize the importance of providing a safe and healthful working environment for NM’s construction workforce. To advance our mutual goal, we strongly agree on the need to develop a working relationship that creates mutual trust and respect for the respective roles of each organization in the construction process.

We remain committed to work as partners to achieve construction workplace safety through implementing the provisions of the Construction Health and Safety Excellence (CHASE) partnering program as stated in the National agreement between Federal OSHA and AGC of America. Implementation of a State level partnering charter is expected to result in decreased injuries, illnesses, and fatalities in the construction industry.
